

Risk Assessment RA13 - COVID-19

This risk assessment is an addendum to the FOLK 'Health & Safety Statements and Risk Assessments' document Issue 5 and is applicable to Work Parties during the 2020 COVID-19 outbreak whilst precautions are required and/or recommended by the Government.

Hazard/Issue	Risk Control Measure
Approval of	Work parties should only be held with the approval of the FOLK Working
Work Parties	Party Coordinator who should consult appropriately with CBC.
Risk	• This Risk Assessment will apply to all working whilst COVID-19 precautions
Assessment	need to be applied.
	• The Working Party Coordinator and/or the Working Party Leader will
	consider whether there are any other risks not included here that need to be
	considered for any specific tasks to be undertaken and, if so, identify any
	other risk control measures that will be required.
	• The Working Party Leader will advise/remind all volunteers at the start of a
	work party of the COVID-19 risks and control measures that are applicable.
	• This COVID-19 risk assessment will be kept under review and be modified
	appropriately as and when Government requirements and recommendations
	are adjusted.
Attendance	Persons who are classified as 'clinically extremely vulnerable' (see
constraints	https://www.gov.uk/government/publications/guidance-on-shielding-and-
	protecting-extremely-vulnerable-persons-from-covid-19/guidance-on-
	shielding-and-protecting-extremely-vulnerable-persons-from-covid-19) must
	review their particular circumstances to decide for themselves whether they
	are sufficiently fit and healthy to attend work parties. Should they decide to attend then they should notify the Working Party Leader that they are in this
	category and they must pay particular attention to maintaining appropriate
	social distancing.
	 Persons who were previously classified as 'clinically vulnerable' (e.g. people
	aged 70 or older, with or without relevant medical conditions) may, if they so
	wish, attend work parties.
	 All volunteers attending work parties should follow the Government 'staying
	alert and safe' guidelines (see
	https://www.gov.uk/government/publications/staying-alert-and-safe-social-
	distancing/staying-alert-and-safe-social-distancing-after-4-july).
	• Persons who have any symptoms of COVID-19, even if they are mild, must
	not attend work parties.
	• Persons who are in a household where someone has COVID-19, or COVID-19
	symptoms, must not attend work parties.
	• Persons who think they may have been in contact with someone who has
	COVID-19 within the last 7 days must not attend work parties.
Numbers	• Numbers attending work parties, as from 1 August 2020, will no longer be
attending work	restricted and volunteers may turn up without pre-booking
parties	
Travelling to	• Car sharing will not be used. Persons should travel/walk to the meeting point
the work party	separately.
	• The meeting point will, as from 1 August 2020, revert to the usual Tramway
	Cottage Car Park.

Social	• At all times the aim should be to maintain a minimum distance of 2m
distancing	between people
Working requirements	 The recommendation to wear hi-viz vests from a common stock held by FOLK (as stated on page 4 of the 'Health & Safety Statements and Risk Assessments' document) will still be applied but at the end of each work party these will be bagged and taken away by the Working Party Leader to be laundered prior to the next working party. All people attending must wear gloves provided by themselves throughout the work party. These gloves should be sound and free from tears or holes. People should bring with them their own supply of hand-sanitiser and use it appropriately. People should bring their own drinks and snacks as they require and not share them with others.
Materials and tools handling	 Only the Working Party Leader will enter the enclosed space of the tool store. He/she will place all the materials and tools needed outside the tool store.
	• Each person will remove the materials and tools they require in turn from outside the store.
	• The materials and tools selected by an individual should, preferably, only be handled and used by that individual. The sharing of materials and tools should be minimised. In line with the statement above, gloves should be worn at all such times.
	• At the end of the work party, people should individually return the materials and tools they use to the outside of the tool store. The Working Party Leader will then return them into the tool store.
	 Materials and tools should not be re-used for a period of at least 3 days after use so as to allow any possible viral contamination to die off. This will be achieved by not holding work parties, or accessing the tool store, more frequently.
Work party monitoring	• The Working Party Leader will monitor the working practices throughout the duration of the work party to check that the risk control measures are being applied correctly and advise people as necessary
	 The Working Party Leader will also monitor for any passing members of the public, or other persons in the locality, with the aim of maintaining or advising on social distancing between them and working party members All people attending work parties should remain vigilant and assist the
	Working Party Leader in maintaining the risk control measures
Post work party	 It is recommended that all people attending a work party should fully launder their work wear upon their return home Should any person attending a work party develop any potential COVID-19 symptoms within 7 days of attending a work party they should advise the Working Party Coordinator as soon as possible and he/she will contact and
	inform all other attendees at that work party

It should be noted that all parts of the existing FOLK 'Health & Safety Statements and Risk Assessments' document Issue 5 continue to apply, e.g. those related to general working and the use of fires.
